

Heat Detector

Introduction

This Heat Alarm constantly monitors for temperature changes in its environment and if it senses a sudden rise of temperature the sensitivity of the alarm is increased, both heightening its capability for detecting fires and reducing the likelihood of false alarms.

This heat alarm provides quick detection of rapid temperature increases. Its reaction to heat rather than smoke makes it ideal for installation in kitchen areas and garages in order to avoid false alarms caused by cooking and vehicle fumes.

Features and Benefits

- 10 Year sealed for life battery (Typical).
- Large central button - Test /Silence.
- Silence allows the alarm to be silenced in the event of a known false alarm.
- Thermistek multi-sensor technology.
- Daily battery self test and low battery reporting.
- Digital Heartbeat.
- Suitable for use in Boiler Room / Kitchen / Laundry Room / Loft / Garage.
- Bi-directional TAO technology.

Compatibility

Compatible with TAO compatible alarm receivers
