

JOB DESCRIPTION

Job Title: Planned Maintenance Technician

Reporting to (Title): Service Manager

Department/Business Unit: Legrand Care

Base Location: Field Based

Work Location/s: Field based working on client assets

Overall Job Purpose:

We are looking for dedicated PPM Technician at Legrand Care Service department to conduct routine inspections and maintenance on assets. This role involves following planned maintenance schedules, taking ownership of problem-solving, and collaborating to upskill operations and technicians. You will play a key role in supporting asset reliability through maintenance plan development and optimisation

Job Competencies / Key Skills:

Essential

- Excellent communication (verbal and written) skills
- Excellent organisational skills
- Excellent customer-facing skills
- Full valid driving license and a willingness to travel within the UK
- Flexible working hours
- Familiarity with health and safety regulations and compliance standards.
- Ability to read and interpret technical drawings and schematics

Desirable

- Ideally you will have completed a Modern Advanced Level Apprenticeship to Level 3 in Engineering Maintenance or equivalent.
- Proven experience in technical and/or maintenance engineering position

Personal Attributes:

- Ability to cope in a complex and fast changing environment, and to respond calmly and rationally to changing aspirations in a deadline driven situation.
- Strong planning and organising skills including the ability to manage several work orders simultaneously
- Good team player, self-motivated and able to work on own initiative.
- Ability to judge complex situations and assess when to escalate issues.
- Perform scheduled preventive maintenance on equipment and systems.
- Diagnose faults and carry out corrective actions promptly.
- Maintain accurate records of maintenance activities and asset performance.
- Support continuous improvement initiatives for reliability and efficiency
